

# We are growing. Are you?

Ogone is looking for a **NETWORK SECURITY ENGINEER** m/f  
for our Brussels HQ

## YOUR JOB

Your main responsibility is to maintain and improve the Ogone IT infrastructure (production and non production) together with your colleagues. You have to make sure that our payment platform keeps up availability, manageability and performance despite of the continuously increasing business requirements and growth.

After an internal training period about our products and services, you will be part of the Ogone System Team allowing you to:

- Manage the network infrastructure, including switches, routing, firewalls, proxies and servers
- Configure and monitor the Intrusion Prevention Systems and respond to security incidents
- Manage and troubleshoot the LAN/WAN infrastructure
- Proactively monitor and respond to network and security incidents
- Be able to identify which latest trends and technologies might have fit with our environment and its requirements
- Empower standardization in our environment and perform automation of operational tasks where possible
- Take the availability, integrity, security & recoverability of Ogone's infrastructure as a personal objective, assure it is compliant with our business requirements and SLA and propose solutions/evolutions to improve this objective
- Perform projects related to our environment with a focus on increasing performance, availability and scalability of our infrastructure
- Provide reporting (daily/monthly/yearly) on our infrastructure performance and be able to perform proactive trend-analysis and growth forecasting based on indicators given by your management

[www.ogone.com](http://www.ogone.com)

Challenges offered by our business environment:

- Ensuring the compliance of our infrastructure with the highest level of security imposed by our sensitive business activities and industry standards (Payment Card Industry Data Security Standards)
- Sizing the infrastructure while foreseeing the growth of the number of transactions processed by our payment services platform (>50% yearly) and of the number of services provided
- Planning the capacity of our infrastructure for the next 3 years, under specific and complex constraints, to sustain unattended and sudden peaks of transactions (web ticketing sales, online donation, e-commerce limited-in-time promotions, etc.)
- Keeping our platform constantly up-to-date while respecting the 'zero down-time' expectations of our worldwide spread customer base, tolerating no 'system maintenance' even during night or week-end

## YOUR QUALITIES

Background:

- For this challenging IT function, we need a talented and passionate System Engineer whose curiosity for technology drives him to polyvalence
- Higher education in IT/Engineering or equivalent by experience
- At least 6-7 years of experience in IT
- Last 3 years spent in the operational management and evolution of an IT infrastructure in a mission critical environment with 24/7/365 availability requirements

Languages:

- Excellent level of English
- Fluent in French and/or Dutch is an asset

Technical skills:

- A proven experience in the following areas, potentially specialized in Networking/Security or System, although a rather good level in both aspects is expected
  - Networking and Security  
*General networking (TCP/IP, DNS, HTTP/S, SMTP, FTP, tunneling), Firewall and VPN (Checkpoint, Juniper), Routing (Cisco), Switching (HP Procurve), Load balancing (F5, Cisco), BGP, SSL Certificates, Proxy (Bluecoat), Web application firewalls, Vulnerability scanning and remediation, Log correlation and event alerting systems, Network monitoring*
  - Server  
*Virtualization (VMWare ESX), MS Windows Server (2003/2008) administration, Backup/restore and assorted operations, Deployment, System Monitoring*
- Security minded and, ideally, already involved in the implementation of security standards (PCI-DSS, ISO)
- Practical experience working with an IT Service Management framework like ITIL

Soft skills:

- Mature and accountable
- Strong analytical skills, problem solving ability and stress resistant capability
- Thorough, methodical and business minded
- Used to work in project context, to propose a realistic planning and respect them
- Flexible
